WORK EXPERIENCE

Allies Interactive Services private limited: Frontend Developer Intern, Kanpur, India

May 2017 - June 2017

Project Title: Photosearch

This Project was forked from other open source project with aim to build a better search frontend (UI/UX) and a metadata indexer for ElasticSearch using latest and better technologies (30% better). The technology Stack consists of latest edition of JavaScript (ES6), React, Redux, ElasticSearch, Kibana, Node.Js, Yarn, Docker, and many other open source technologies.

JustFreeThemes: Theme Reviewer, Remote

June 2016 - Present

Working as a WordPress free Theme Reviewer and content developer.

Scholars for Change Campaign: Campaign Associate Intern, IIM Ahmedabad, India

May 2016 - June 2016

In this internship, we designed "Learning Projects" involving an active-exploration of real world problems for students of GRADE 6-8 based on MATHEMATICS and SCIENCE.

PROJECTS

Path Finder - An Obstacle Avoiding Robot using Arduino with embedded C. B. Tech Minor Project

Using Arduino and its smart components, with an Artificial Intelligence, we designed a machine that will avoid any obstacles in its path and move forward. Open sourced on GitHub.

IDF (India's Digital Footprint) Campaign.

Community Campaign (Google Student Community, DIT University)

Google Students Community-DIT University, Dehradun started a campaign to bring the local businesses online. The main aim was to leave a global impact of all the basic local business on google maps. It is a contribution to the Digital India Campaign.

The Force – A WordPress.org Plugin.

Personal Project

Developed this open source plugin for the WordPress' admin dashboard. When activated admin will see random quotes and dialogues from the Star Wars series on the top-right corner of the admin's dashboard using PHP.
